

JOB NAME	Maintenance Engineer
TEAM	Production
REPORTS TO	Operations Manager
DATE	17 April 2019
VERSION	1.0

COMPANY

MICROOLED, a human sized company develops, manufactures, and sells OLED microdisplays with very high resolution, outstanding image quality, and highpower efficiency for applications like electronic viewfinders, head mounted displays, wearable Augmented Reality, Virtual Reality, etc. The company has its offices and a dedicated microdisplay manufacturing line inside the MINATEC innovation campus in Grenoble/ France. Sales have steadily grown since with a mean annual growth rate of over 40%

We find satisfaction in doing our jobs well, and we value the companionship that comes from working with others who share our total commitment to our customers and one another. We are looking for an ambitious and self-driven Maintenance Engineer to help us continue our impressive growth as a leader in OLED microdisplay solutions.

CONTEXT

The manufacturing process of MICROOLED microdisplay products is complex and require high technology equipments.

To better control our production tools and to put in place a preventive and corrective maintenance strategy, we are looking for a Maintenance Engineer.

MISSION

As a key player you will mainly

- be responsible for equipment performances, specification, control and spare part management
- improve and guarantee a high level of uptime
- build PM plan
- coordinate internal and external repairing in case of serious failure,
- write and deploy preventive maintenance procedures
- train and coach the production team ensuring quality and safety behaviours are adopted.
- define and implement action plans to improve equipment performances
- deploy continuous improvement actions to reduce defectivity and improve yield
- propose solution to reduce maintenance cost (life times, second sources, ...)

PROFILE

- MS in industrial maintenance or similar with minimum 5 years relevant experience ideally in cleanroom environment.
- Strong oral and written communication skills with excellent technical writing abilities
- Ability to work in a team and independently.
- open to people, natural leadership (build solutions with people, listen to operators remarks and/or constraints...)
- Ability to create and maintain good working relationships inside and outside of the company

- Ability to build and work with multi-disciplinary staff
- Ability to seek, organise and exchange information for decision making and problem solving
- Broad technical knowledge
- Fluent in English
