

JOB NAME	Tool owner Engineer
TEAM	Production
REPORTS TO	Operation Manager
DATE	Feb 2018
VERSION	1.0

COMPANY

MICROOLED (www.microoled.net) develops, manufactures and sells microdisplays based on OLEDs with very high resolution, high image quality and very low power consumption for near-to-the eye applications like electronic viewfinders for digital cameras, head-mounted displays, or devices for Augmented or Virtual Reality.

Founded in 2007, MicroOLED is a privately held company whose offices and manufacturing line are located inside the MINATEC innovation campus in Grenoble/ France.

We are constantly looking for highly motivated candidates with the right skill set who want to be involved with creating breaking-edge technology at a pioneering company.

CONTEXT

The manufacturing process of MICROOLED microdisplay products is complex and require high technology equipments.

To better control our production tools and to put in place a preventive and corrective maintenance strategy, we look for a maintenance engineer.

MISSION

Support Maintenance

- ▶ Is responsible for equipment performances, specification, control and spare part management
- ▶ Guaranties 80% of uptime
- ▶ Builds PM plan
- ▶ In case of serious failure, coordinates internal and external repairing

Training

- ▶ Writes, adapts and/or translates a draft of preventive maintenance procedures
- ▶ Trains TPM operators

Improvement

- ▶ Defines and implements action plans to improve equipment performances
- ▶ Deploys continuous improvement actions to reduce defectively and improve yield
- ▶ Proposes solution to reduce maintenance cost (life times, second sources, ...)

PROFILE

- ▶ Ability to work in team, communication skills
- ▶ Broad technical knowledge
- ▶ Responsive, sense of priorities
- ▶ Autonomous
- ▶ Fluent in english
