

JOB NAME	Supply Chain Manager
TEAM	Manufacturing team
DATE	March 2019

COMPANY

MICROOLED (www.microoled.net), a human size company develops, manufactures and sells OLED microdisplays with very high resolution, outstanding image quality, and high power efficiency for applications like electronic viewfinders, head mounted displays, wearable Augmented Reality, Virtual Reality, etc. The company has its offices and a dedicated microdisplay manufacturing line inside the MINATEC innovation campus in Grenoble/ France. Sales have steadily grown since with a mean annual growth rate of over 40%. MICROOLED received the Best Electronic Design award in 2012, the Ernst & Young Entrepreneur of the year award for the region Rhone-Alpes in 2014, the Champion of Growth national award in 2017, and together with Fraunhofer FEP the Innovation Award of the French-German Chamber of Commerce in 2017.

At Microoled, we find satisfaction in doing our jobs well, and we value the companionship that comes from working with others who share our total commitment to our customers and one another. We are looking for an ambitious and self-driven Supply Chain Manager to help us continue our impressive growth as a leader in OLED microdisplays solutions.

MISSION

Being part of the manufacturing team, your main objective will be to provide effective production planning and supplies for our facility, ensuring the availability of material taking into account manufacturing constraints and answering to our customers' expectations.

You will :

- plan, implement and monitor our overall supply chain process in order to maximize efficiency and productivity and to guarantee on time Microoled products availability,
- manage production planning (short-medium-long term), capacity and inventory,
- monitor suppliers /subcontractors (manufacturing, logistics, transport...) capacities on a regular basis to ensure procurement parameters updating: manufacturing capacity, inventory capacities, transportation lead times...
- coordinate planned production readiness with the production team, and subcontractors,
- document physical supply chain processes, such as workflows, cycle times, or system flows,
- work closely with the manufacturing, quality teams,
- participate in the coordination of engineering changes, product line extensions, or new product launches to ensure orderly and timely transitions in material or production flow,
- analyse information about supplier performance or procurement program success,
- analyse and report materials excess, obsolescence, defective products taking corrective preventative actions that will minimize financial risk,
- Regularly report on process performance measures and continuously seek to identify improvement opportunities,

- support the Executive team through the provision of accurate and timely information to enable effective decision making.

PROFILE

- Bachelor /Master in Supply Chain Management with a significant experience in an equivalent position.
- Strong planning and organizing skills
- Good Knowledge of basic computer packages e.g. e-Procurement Systems, Email, Excel
- Project management skills including strong attention to detail, and ability to coordinate and interact with cross-functional teams
- Ability to create and maintain good working relationships inside and outside of the company.
- Good communication and negotiation skills
- Able to make data-driven decisions
- Ability to effectively manage discrepancies, incorrect deliveries and notify suppliers/finance of any adjustments.
- Analytical mind and deductive skills to understand the processes and propose improvements
- Customer orientated, enthusiastic approach.
- Language: Fluent English and French.
